

ONEDRIP®

The super resistant dripline

Product description

Onedrip® is a medium density polyethylene dripline, characterized by a flat single-drop dripper, with self-cleaning turbulent flow, welded to the wall of the pipe.

The exceptional labyrinth makes it insensitive to pressure and incredibly resistant to occlusion.

Thanks to its wide range of diameters, thicknesses and flow rates, **Onedrip®** proves to be a widely versatile product suitable for satisfying various irrigation needs: from seasonal to multi-seasonal crops in thicknesses greater than 18mil.

Recommended applications

Surface application is recommended, on level ground that does not require pressure compensation.

Crops

Onedrip® is ideal for open field or greenhouse applications in seasonal horticulture or floriculture crops such as onion, garlic, celery, carrot, tomato, strawberry, asparagus, melon, watermelon, potato, cucumber, courgette, aubergine, pepper and more.

Dripper features

- Flat dripper;
- Turbulent flow;
- Labyrinth design with self-cleaning effect;
- integrated filter reduces the passage of impurities;
- Low sensitivity to pressure;
- Low coefficient of technological variation;

Advantages

- Excellent emission uniformity along the entire length of the line;
- High resistance to UV rays and fertilizers used in agriculture;
- Ease of application thanks to the double continuous strip, emitter side;
- Very little maintenance required.

Maximum length of recommended lines, in metres, with emission uniformity (E.U.) of 85%
